## Step 2: Determine whether your TV has a flat back or an irregular or obstructed back

- 1 Carefully place your TV screen face-down on a cushioned, clean surface to protect the screen from damages and scratches.
- 2 If your TV has a table-top stand attached, remove the stand. See the documentation that came with your TV for instructions.
- 3 Temporarily lay the TV brackets (Q) on the back of your TV.
- 4 Align the screw holes in the TV brackets with the mounting screw holes on your TV.
- 5 Identify which type of back your TV may have:
  - **Flat back:** The brackets lay flush against the back of your TV and do not block any jacks. You do not need spacers when assembling the wall mount.

- **Obstructed back:** The brackets block any of the jacks on the back of your TV. You will need spacers when assembling the wall mount.

- **Irregularly-shaped back:** There is a gap between the bracket and some part of the back of your TV. You will need spacers when assembling the wall mount.

- 6 Remove the brackets.

**Step 3: Option 1 - Mounting bracket instructions for a TV with a flat back**

**To mount the TV brackets:**

- 1 Align the TV brackets (**Q**) with the mounting screw holes on the back of the TV. Make sure the hooks face the bottom of the TV. Make sure that the brackets are level.
- 2 Place the flat washers (**WW** or **XX**) then the lock washers (**QQ**, **RR**, **SS**, or **TT**) over the holes in the TV brackets (**Q**) that align with the screw holes on the back of your TV, then insert the bolt (**HH**, **JJ**, **LL**, or **NN**) through the washers.

**Q TV bracket (2)**

**Step 3: Option 2 - Mounting bracket instructions for a TV with an irregularly shaped or obstructed back**

- 1 Align the TV brackets (**Q**) with the mounting screw holes on the back of the TV. Make sure the hooks face the bottom of the TV. Make sure that the brackets are level.
- 2 Place spacers (**UU** or **VV**) behind the TV brackets and flat washers (**WW** or **XX**) and lock washers (**QQ**, **RR**, **SS**, or **TT**) over the holes in the TV brackets (**Q**), then insert the bolt (**II**, **KK**, **MM**, or **PP**) through the washers.
- 3 Tighten the screws until they are snug against the TV bracket. Do not over tighten.

- 2 Use a level to make sure that the mounting frame is level, then mark the four mounting holes. Remove the mounting frame.
- 3 Drill four 3/16" (4.76 mm) holes 2.5" (64 mm) deep.
- 4 Align the mounting frame (P) with the pilot holes, then secure it to the wall with four lag bolts (AA) and four washers (BB).

**CAUTION:** Make sure that the lag bolts are tight and secure, but do not overtighten them.

**You'll need:**

**Step 4: Option 2 - Mount the frame to a block or concrete wall**

- 1 Place the mounting frame (**P**) against the wall where you intend to mount the TV. Use a level to make sure the mounting frame (**P**) is level, then mark the four mounting holes on the wall. Never locate the mounting holes into the mortar between blocks. Remove the mounting frame.
- 2 Drill four 7/16" (11 mm) holes through the screw marks to a depth of 2.5" (64 mm).
- 3 Insert a concrete anchor (**CC**) into each of the screw holes using a hammer.
- 4 Align the mounting frame over the concrete anchors.
- 5 Place a washer (**BB**) over one of the mounting frame screw holes, then insert a lag bolt (**AA**) and tighten.
